Intro. to Probability & Statistics
Tutorial 1

May 25, 2021

A group of KNUST students from the computer science department conduct a study to determine the efficiency level of computers in KNUST.

1. What is the population of interest in this study?

2. What type of data will these variables assume according to the scale of measurements.

- Brand name of computers

- Storage size of computers

- RAM size of computers

- Computer number in the lab

- Temperature of computers

- Number of air conditioners in the lab

- Upkeep of the lab [daily or weekly]

- Time for lab maintenance and upkeep

- Operating system on a computer

- Booting time for a computer

- Duration of usage of a computer
